QUANTOR
Algorithmic Investment Marketplace

WHO WE ARE

Quantor is a marketplace of investment algorithms and educational solutions for cryptocurrency and traditional financial markets. Quantor ecosystem implements an accelerator for algorithmic traders supporting them in developing investment algorithms for a decentralized economy.

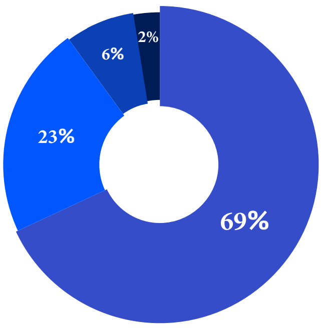
The effectiveness of the platform is achieved through continuous professional training of algorithmic traders, providing them with educational solutions of modern information technologies, financial engineering and algorithmic trading from well-known experts.

Transparency of the ecosystem is ensured by the use of blockchain technology. The records of trading algorithms performance, statistics of all trading algorithms development stages, and developers' professional background are stored in a distributed ledger.

An ability to generate sustainable performance of trading algorithms is provided by creating a reliable system of trust among the ecosystem participants, including developers of trading algorithms, experts, mentors, and investors.

QUANT

The Quant token (QNT) issued by the project will make it possible to use the most effective and reliable algorithms developed and running within the framework of the platform. The maximum number of Quant (QNT) tokens to be issued is 2,000,000,000. The base price of one QNT token without discounts is set at $0.01.



The distribution of tokens.

Placing on the market	69%
Quantor team and founders	23%
Advisors and experts	6%
«Bounty» - campaign and promotion	2%

The funds collected by the platform for work at the initial stage in the cryptocurrency markets will be used for development and further entry the Quantor into the fiat markets. The growth in the number of users on the platform, trading algorithms, and assets under management by algorithms will have a positive effect on growth the QNT token market value.
