

## **What is QUANTOR?**

Quantor is a blockchain-powered ecosystem that emerged as a response to a fundamental shift in investment industry: brings together tech savvy developers and researchers with PhD students from research institutions to develop cutting edge trading solutions - trading algorithms for managing investors capital.

## **What problems does Quantor platform solve?**

Algorithmic trading today is an effective and automated approach in investing. The problem is a lack of information and inappropriate usage of such solutions by unexperienced investors. The solution is to make a marketplace where investors who does not have special knowledge in algorithmic trading can use innovative ready-to-use investment algorithms made by top experts on the platform.

## **Do you have a prototype - MVP?**

At this moment, the educational platform (quantor.co) works successfully, providing access to online courses of quantitative finance. The project is included in the program of support for start-ups of Amazon Activate. Alpha version of the platform (alpha.quantor.co) for testing and creating trading algorithms is ready. A team of well-known advisors in algorithmic trading was formed from Europe and Asia. The integration of blockchain technology to ecosystem is in progress.

## **What for does Quantor use blockchain?**

The blockchain technology is used to store trading algorithms' performance in Ethereum blockchain to make it 100% transparent. The results of all stages of developing trading algorithms will be available in blockchain for external investor' audit. The background of developer, professional certificates he accomplished will be also available for review in blockchain before an investor make decision what algorithm he wants to invest in. Smart-contracts will be used to automate relationship and interaction between investors and developers-quants.

## **What is a QNT token and what is it for?**

Holders of QNT tokens will receive an access to various services on the platform, depending on the number of tokens they own. The more profitable trading algorithms on the platform, the more QNT tokens will required in order to invest in particular algorithm. QNT token will be the mean of exchange in the Quantor ecosystem, providing experts, quants, and investors a wide range of opportunities to interact and collaborate to each other.

## **What is a Trading Algorithm (Bot)?**

Algorithmic trading is a method of executing orders on financial markets by using automated pre-programmed trading algorithms in order to generate profits. Trading algorithms are created by developers and used for analyzing financial data and executing orders according to defined instructions in trading strategy.

## **How can I purchase QNT token?**

You need to open an account on Quantor platform, pass KYC verification, and deposit ETH to your account in order to purchase QNT tokens. You can follow instructions once you registered and logged into your account.

## **What is the token price?**

The initial value of one QNT token without discounts is \$0.01. Cost of the QNT token on the 1st Round of pre-sale period with a discount of 35% is \$0.0065.

## **Is there any minimum in my investment?**

Depending on the round of pre-sale, user can purchase minimum amount of tokens with discount on corresponding round of pre-sale. The minimum amount varies on Ethereum current price at the moment of purchase. The minimum amount in US Dollars on the 1st Round of pre-sale: \$503.75

## **Is there minimum amount of tokens to buy?**

Minimum amount of QNT tokens for purchase is 77,500 during Pre-sale Round 1;  
Minimum amount of QNT tokens for purchase is 62,500 during Pre-sale Round 2;

## **Can I buy Quantor token with fiat or other cryptocurrencies?**

You able to buy Quant token (QNT) on pre-sale with ETH only.

## **What wallet can I use to contribute?**

Any ERC20 standard supporting wallet. **Do NOT** contribute from an exchange wallet.
